Exo-planets: The Search For Alien Life

Thomas Killestein
Winner of the BAA Sir Patrick Moore Prize 2016
for outstanding work by a person under 21 years of age

Pupils Scouts, Guides especially welcome

Research into extra-solar planets is an exciting new area of astrophysics which is constantly evolving. New exo-planet discoveries are made every week, each more exciting than the previous, one may be earth like and orbits the nearest star.

But what are exo-planets, and how do we discover more about the properties of these intriguing objects?

This talk provides an exciting insight into the field of exo-planetary science, and more about some of the incredible things we are discovering through this ground-breaking area of research.

Free Admission For All
Thursday, 5th. January 2017
6:30pm. for 7:00pm.
Coventry University
Engineering and Computing Building
Off Gulson Road, CV1 5FB
Networking Buffet Afterwards.
Close at 9pm

Reservations please at www.theiet.org/covwarks

Limited Free Car Parking for cars with children, email dwiller @ theiet.org

Nearest Pay and Display is Gosford Street, CV1 5DL evening rates after 6:00pm
