

YEAR 10

(MIXED COURSE WITH FEMALE
PLACES ONLY NOW AVAILABLE)

Physics in Engineering

15 - 17 April 2020

University of Warwick

3 days full board residential course

£285

Get up close to the extraordinary world of physics in engineering, working alongside experienced engineers, scientists and academics to discover its place in our fast-changing high-tech world.

Find out how engineering, physics, and maths come together to bridge the gap between theoretical science and practical engineering. You'll get to learn from industry experts through a mix of masterclasses, workshops and hands-on projects.

Work with top engineering companies to design and create solutions to problems engineers face today. Explore exciting careers in a variety of industries.

Enjoy exclusive access to equipment and facilities, including a tour of the labs at Warwick Manufacturing Group researching battery technology.

Explore stars in the university's pop up indoor planetarium with astronomy PhD students.

Have fun working as a team, sharpening your communication, time management, planning and presentation skills.

Complete a personal questionnaire to help you identify your individual strengths and learn to develop these throughout the course.

Experience life on campus and take part in evening social activities.

Build your CV and make your UCAS application stand out.
